

# Procedure

---

1. Model Creation
2. Giving material Properties
3. Applying Boundary Conditions
4. Applying Load
5. Visualizing the deformations/settlement
6. Obtaining the graphs

# Properties

## Soaked condition

### Ash Mix:

Mass Density = 1050 Kg/m<sup>3</sup>

CBR = 4.3

E = 3.614 MPa

Poisson's Ratio = 0.3

Permeability =  $8 \times 10^{-7}$  m/s

Void Ratio = 7.47

### Subgrade:

Mass Density = 1856 Kg/m<sup>3</sup>

CBR = 6

E = 5.043 MPa

Poisson's Ratio = 0.3

Permeability =  $1.5 \times 10^{-8}$  m/s

Void Ratio = 0.5

## Unsoaked condition

### Ash Mix:

Mass Density = 1050 Kg/m<sup>3</sup>

CBR = 12

E = 10.086 MPa

Poisson's Ratio = 0.3

Permeability =  $8 \times 10^{-7}$  m/s

Void Ratio = 7.47

### Subgrade:

Mass Density = 1856 Kg/m<sup>3</sup>

CBR = 10

E = 8.405 MPa

Poisson's Ratio = 0.3

Permeability =  $1.5 \times 10^{-8}$  m/s

Void Ratio = 0.5

# Boundary conditions and Load

Uniformly distributed Load is  
Provided on the top of  
embankment

Boundary Conditions:  
Base of the embankment is  
restricted in both x and Y  
directions  
Sides of Embankments Are  
restricted in X direction

## Visualizing Displacement of nodes (particle) in Vertical direction

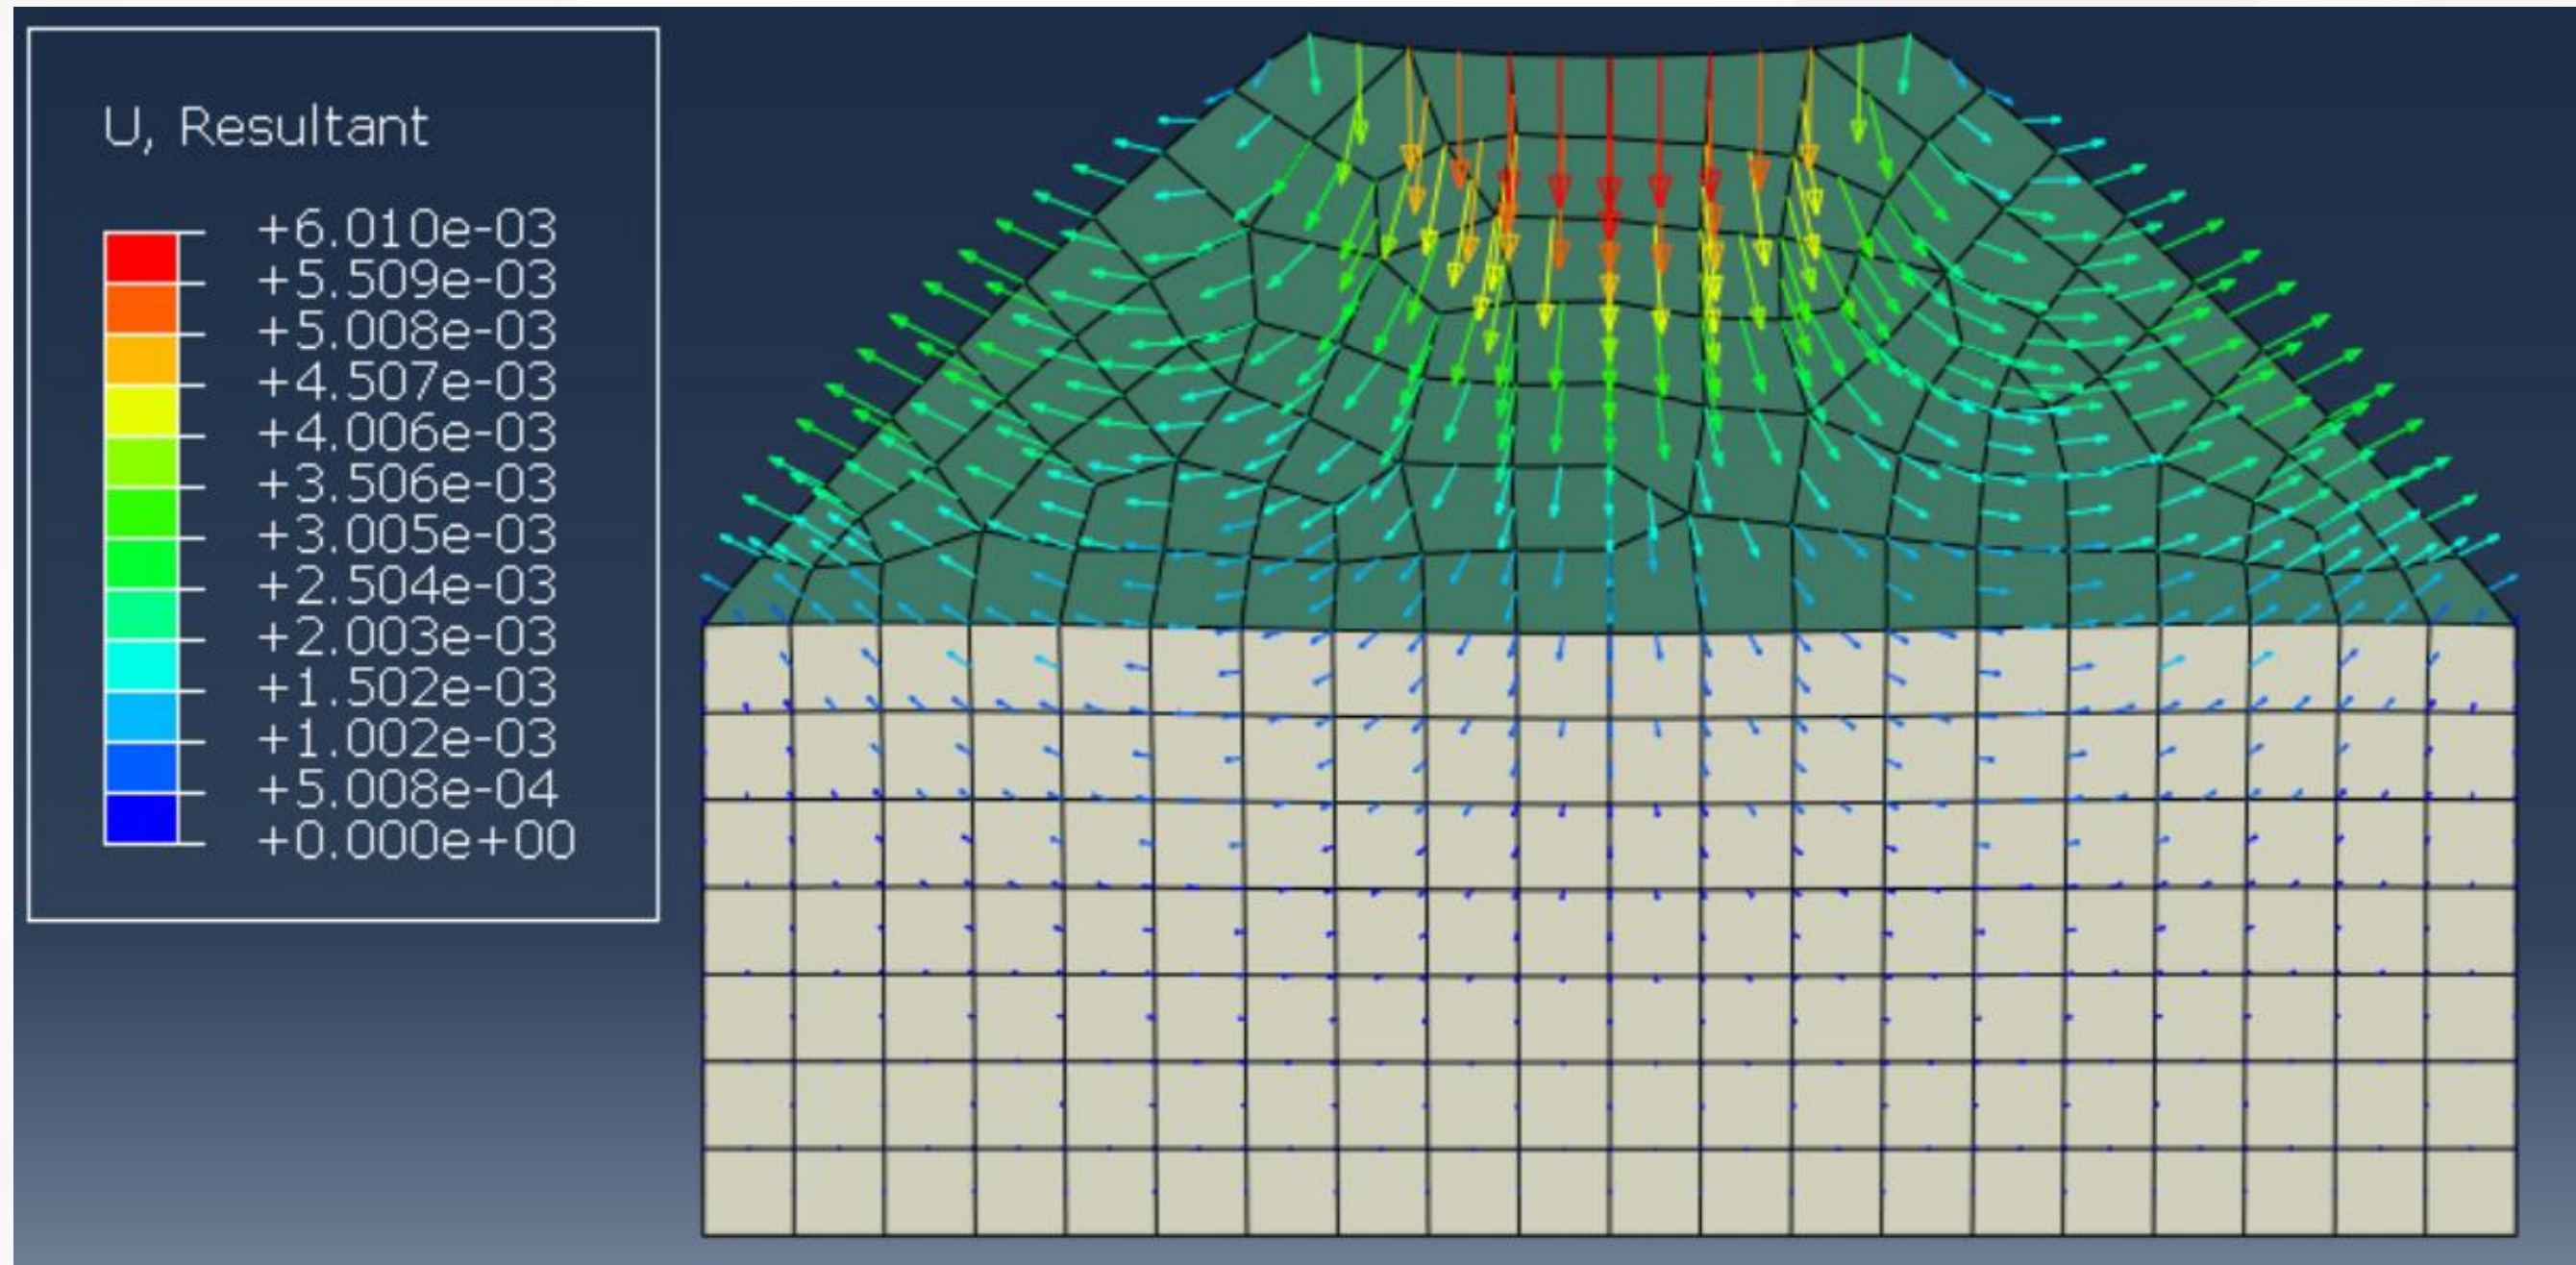

## Visualizing Displacement of nodes (particle) in Horizontal direction

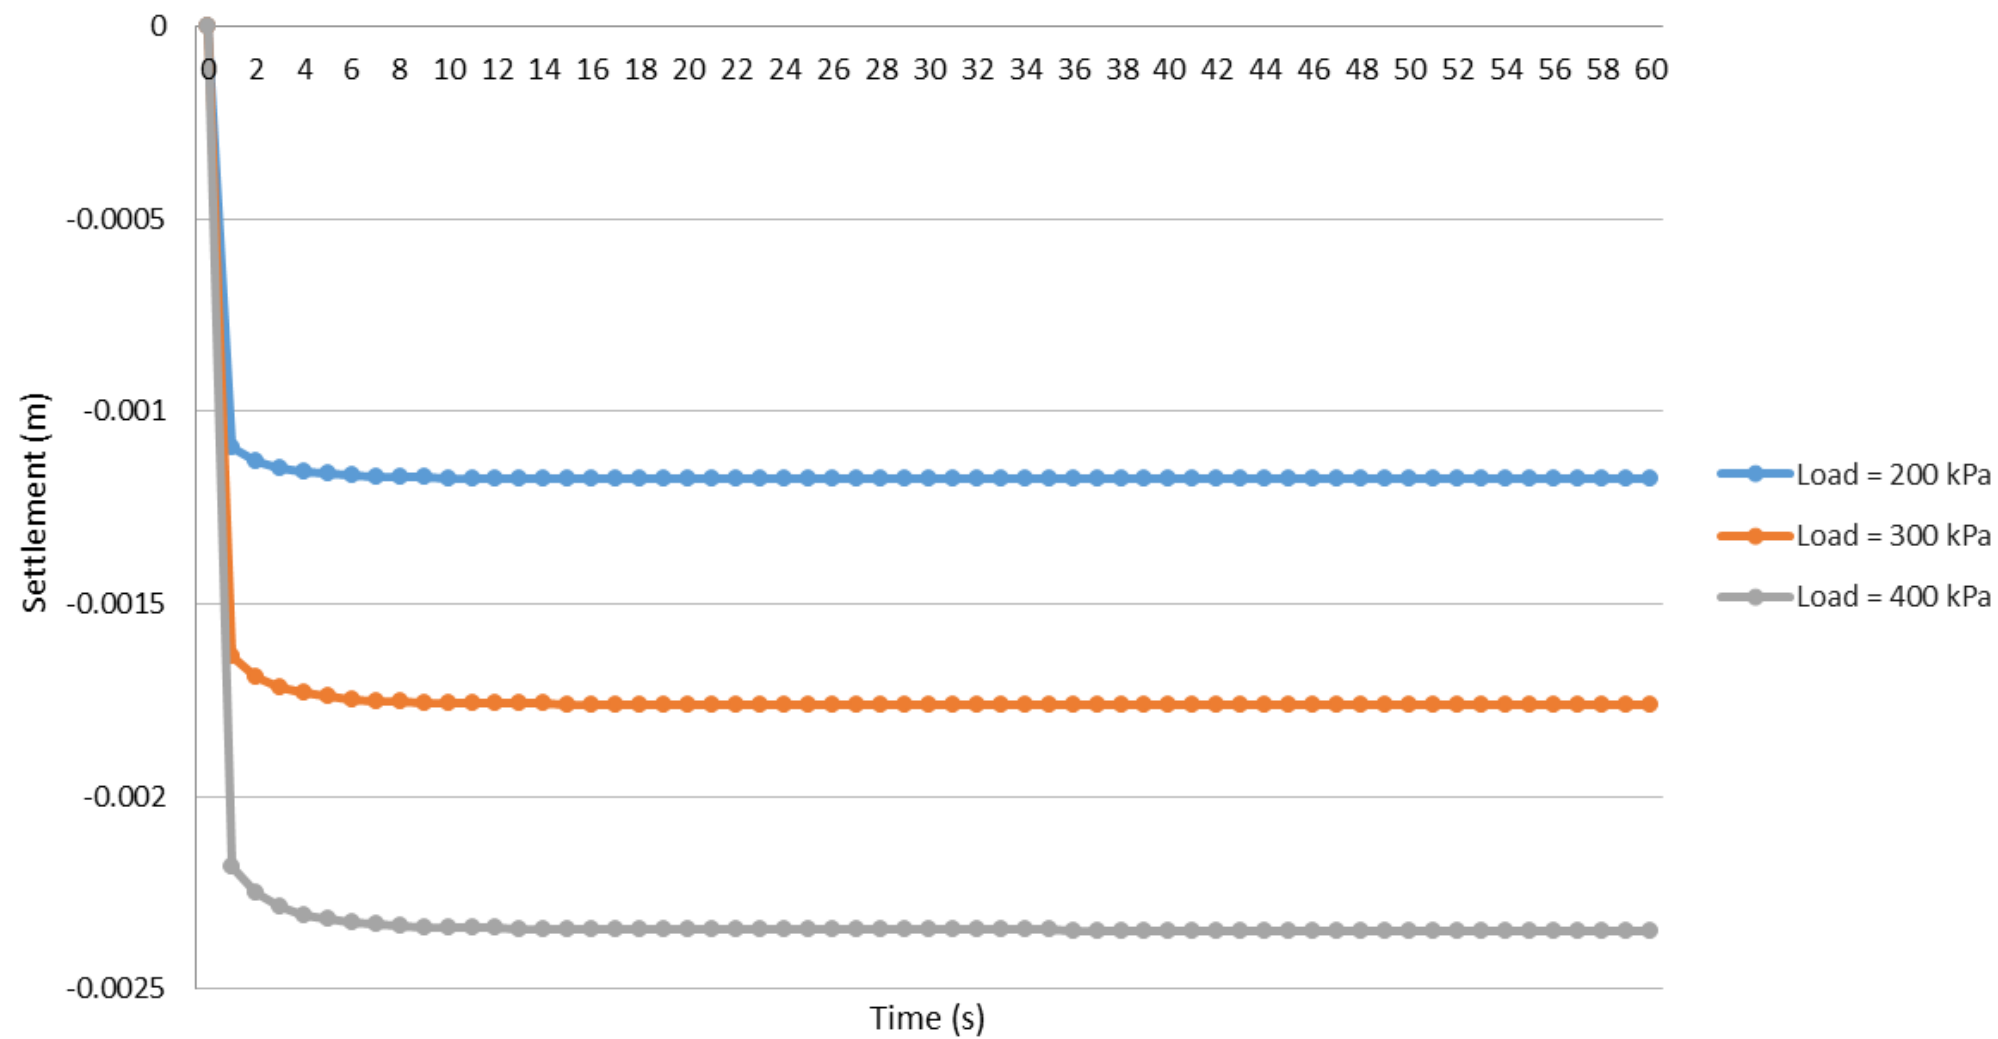

## Visualizing Displacement of nodes (particle)

# Unsoaked CBR Condition, Embankment's Slope 1:1

## Settlement vs Time

## Settlement vs U2

# Unsoaked CBR Condition, Embankment's Slope 1:1

## Settlement vs U1

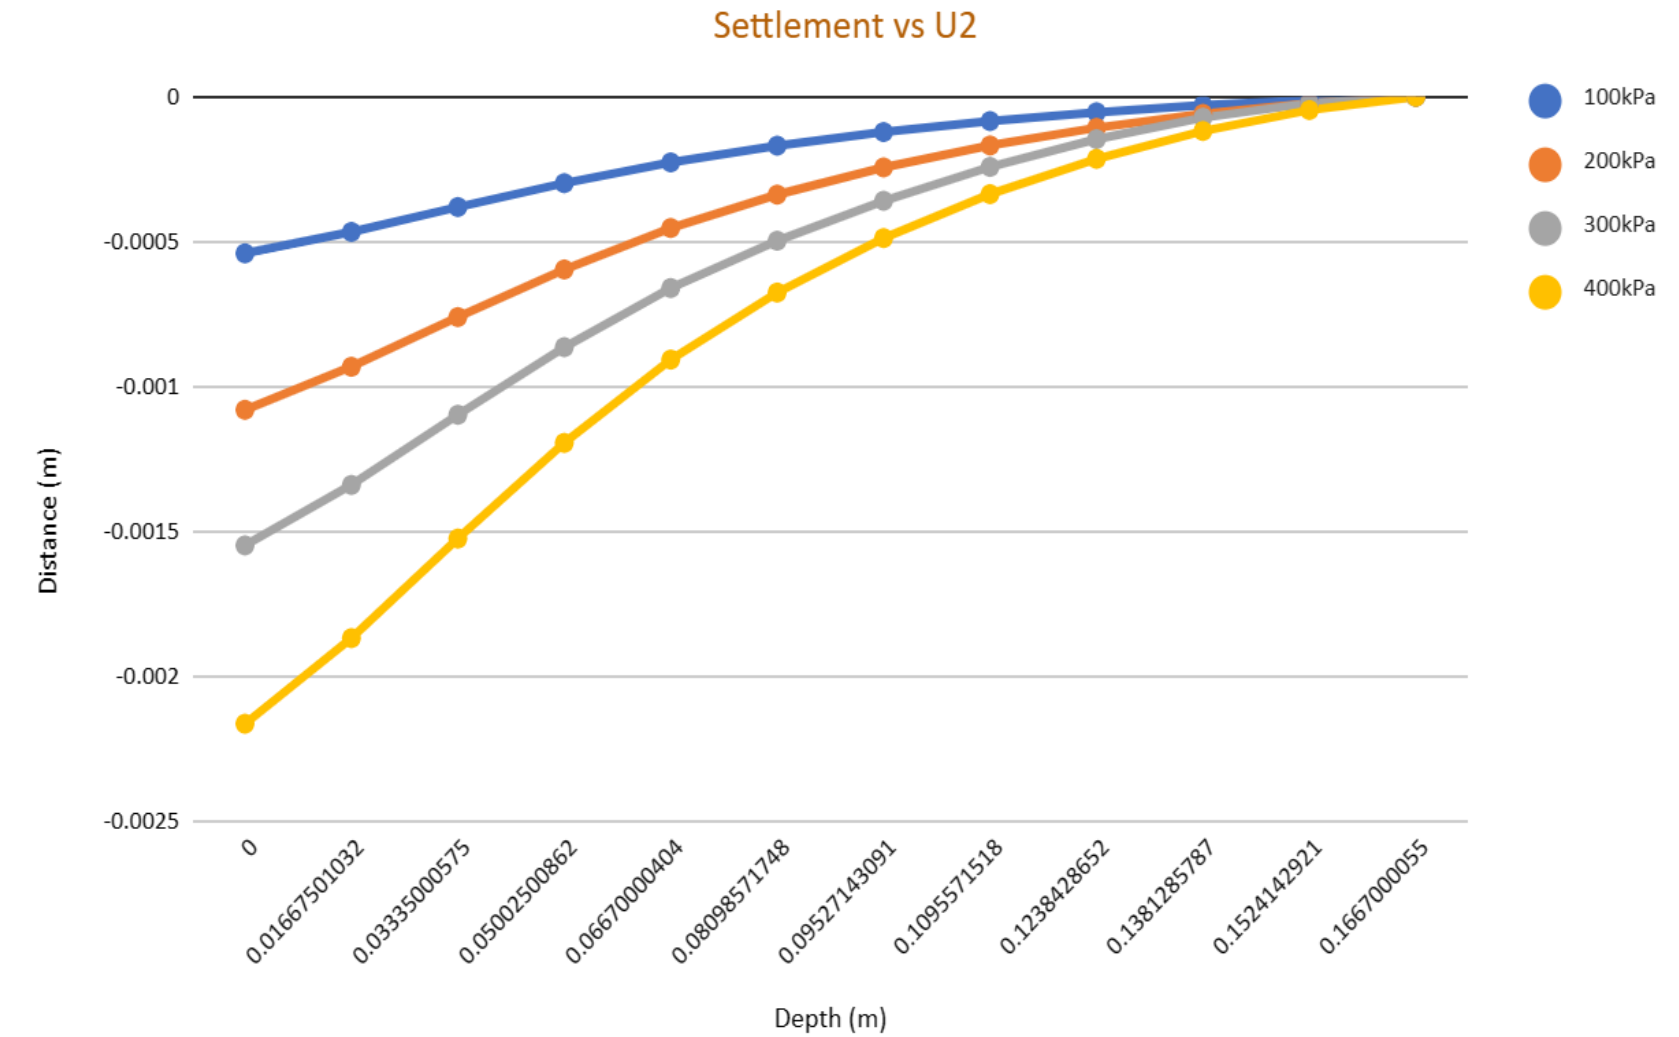

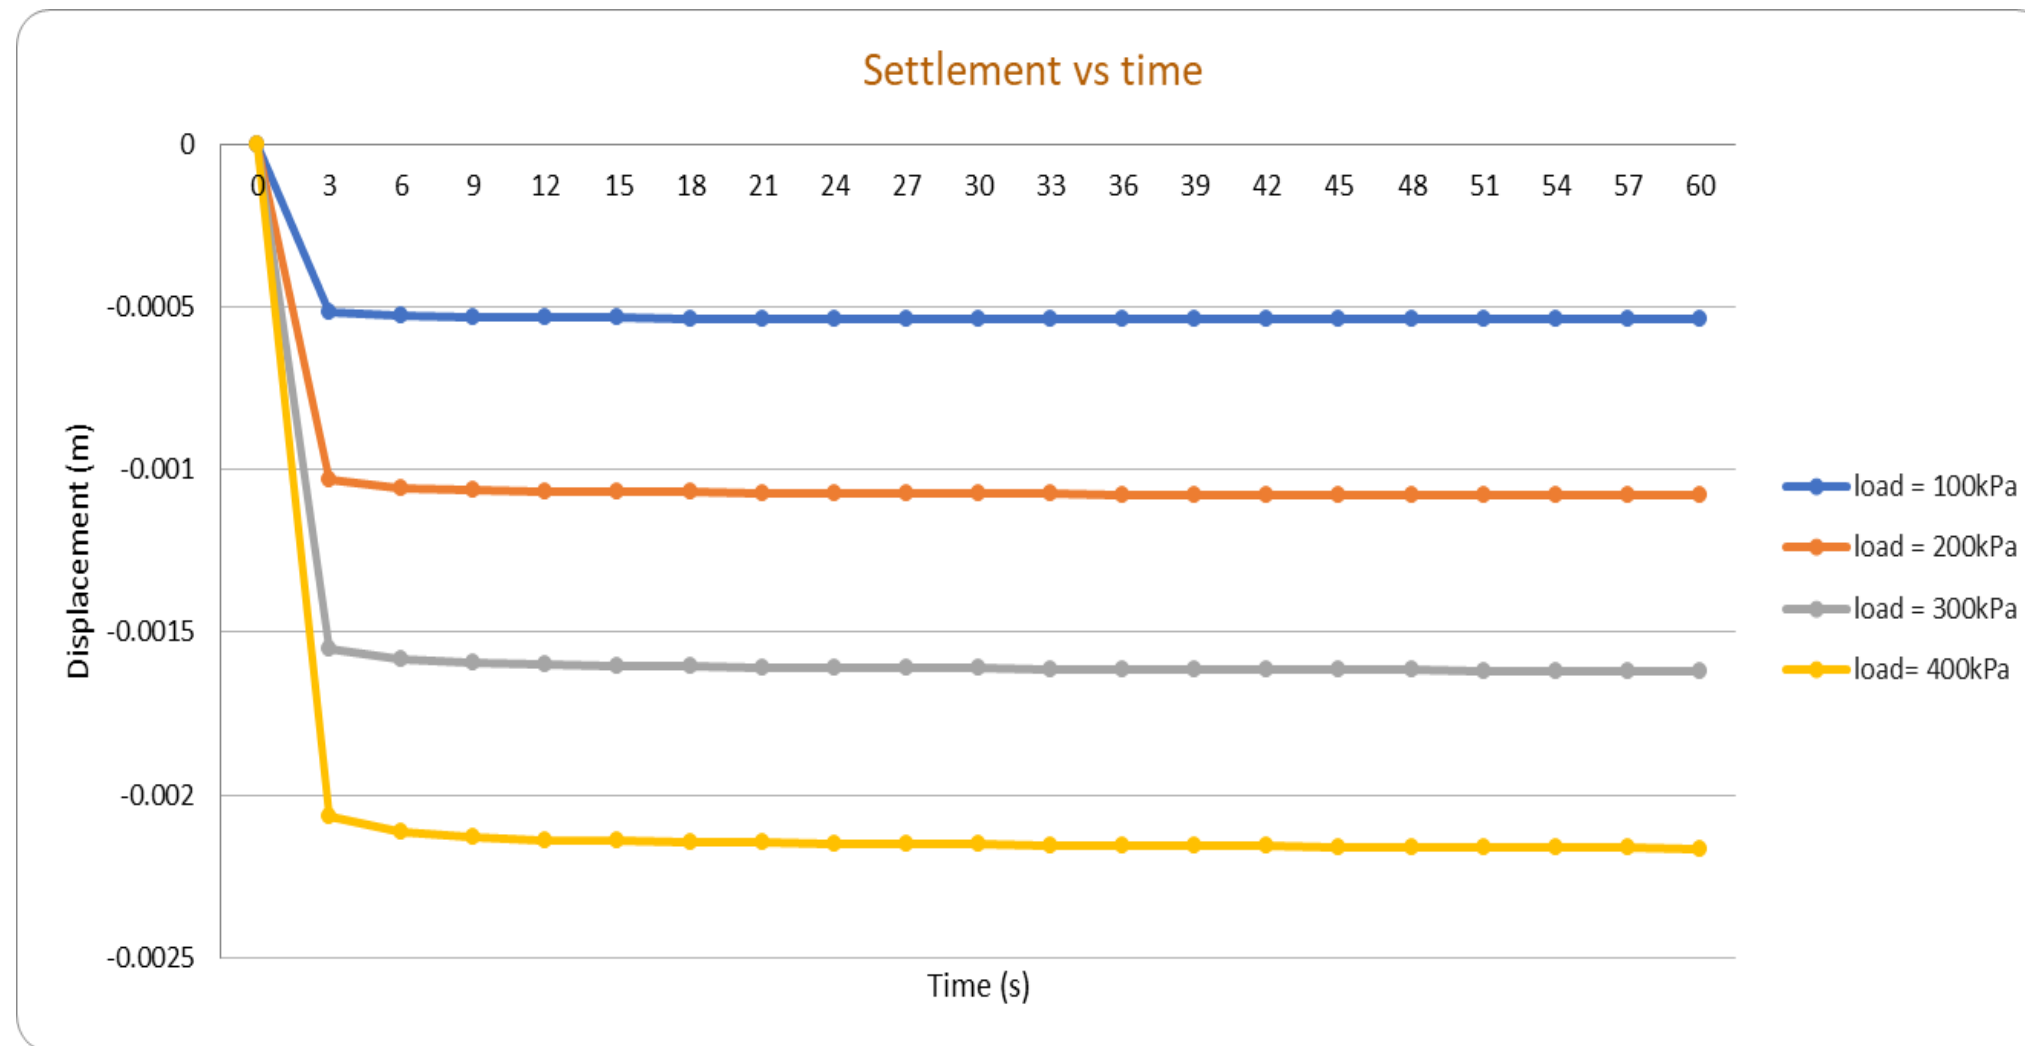

## Stress vs Depth

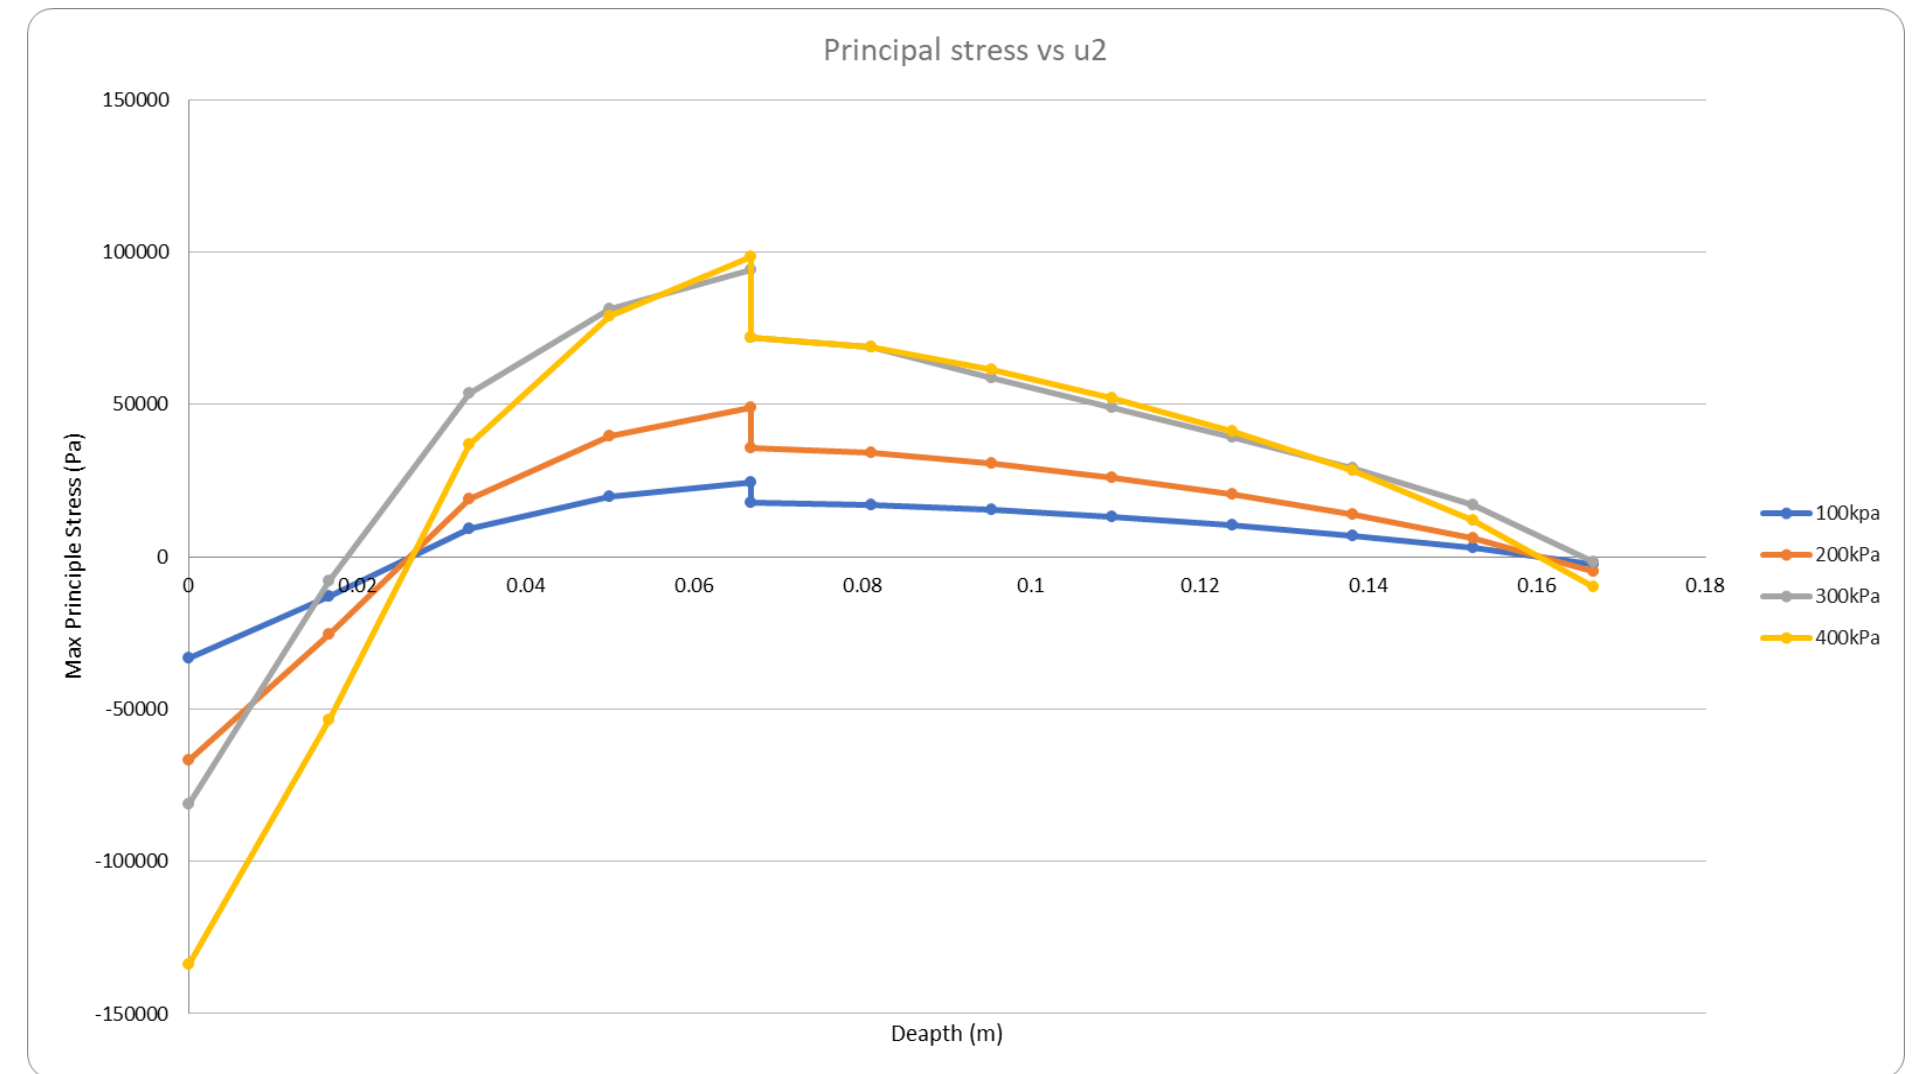

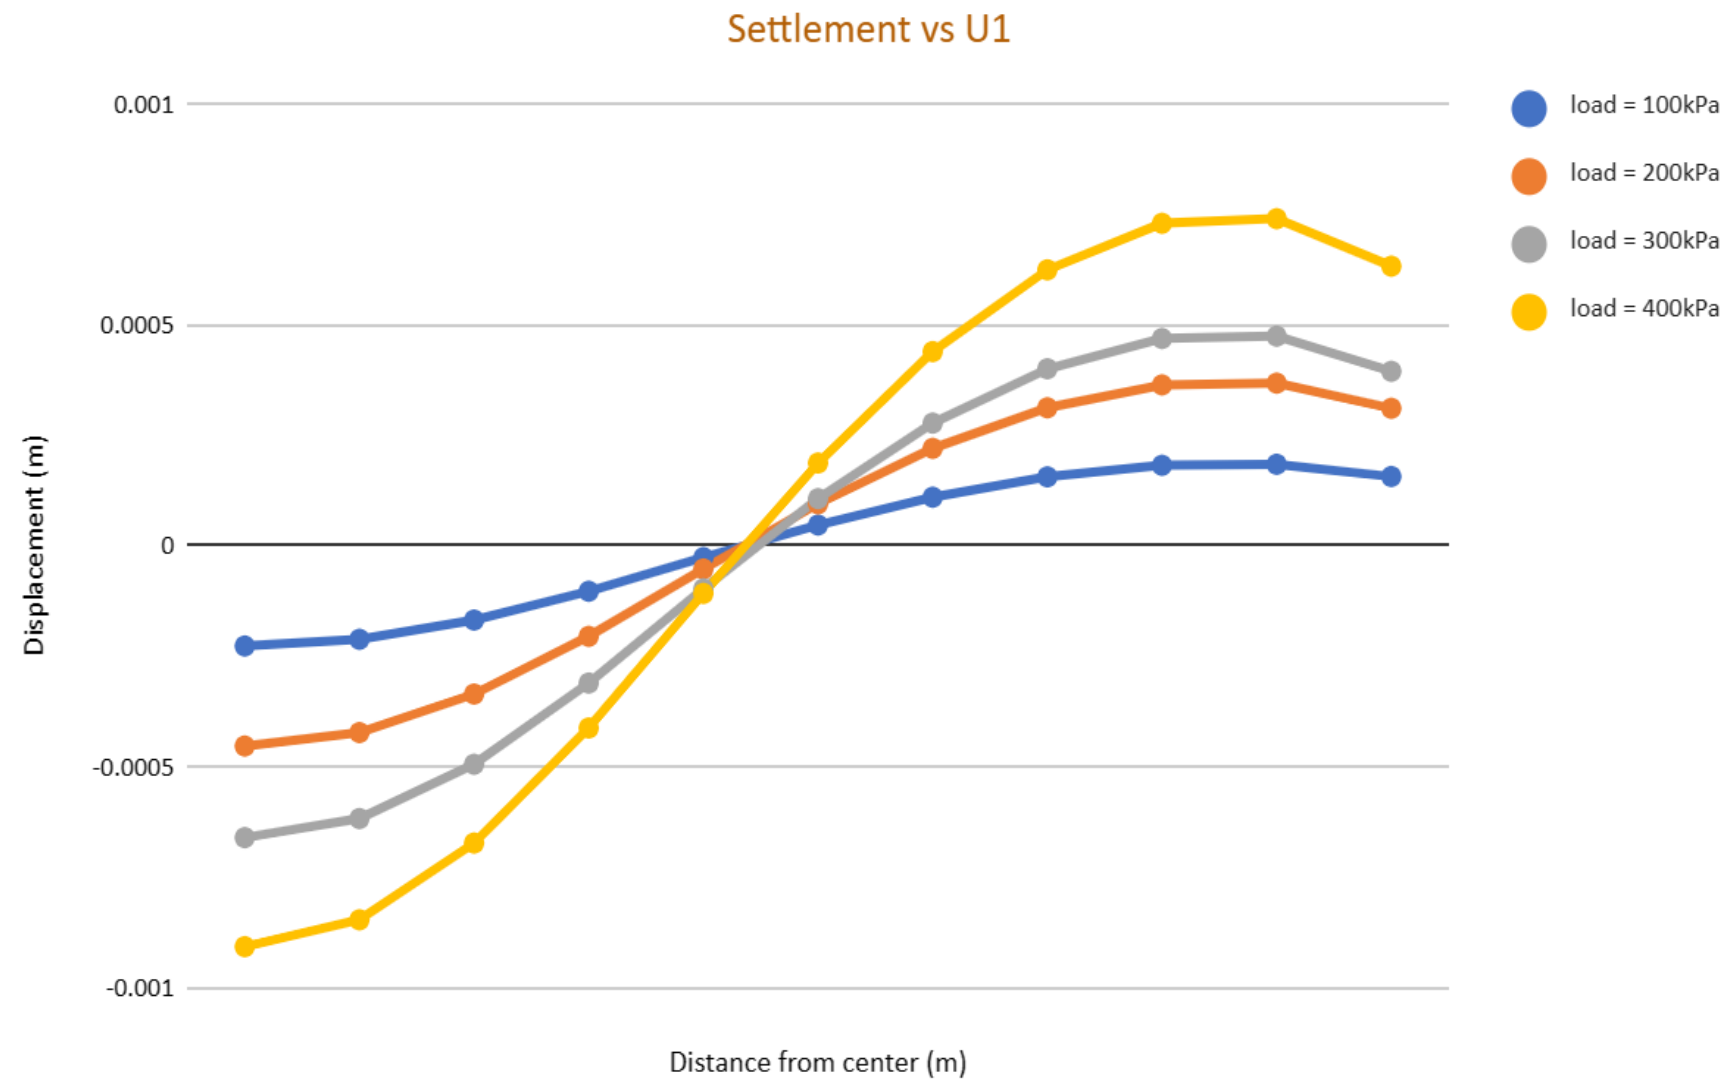

# Unsoaked CBR Condition, Embankment's Slope 1:1.5

# Unsoaked CBR Condition, Embankment's Slope 1:1.5

# Unsoaked CBR Condition, Embankment's Slope 1:2

Settlement vs Time

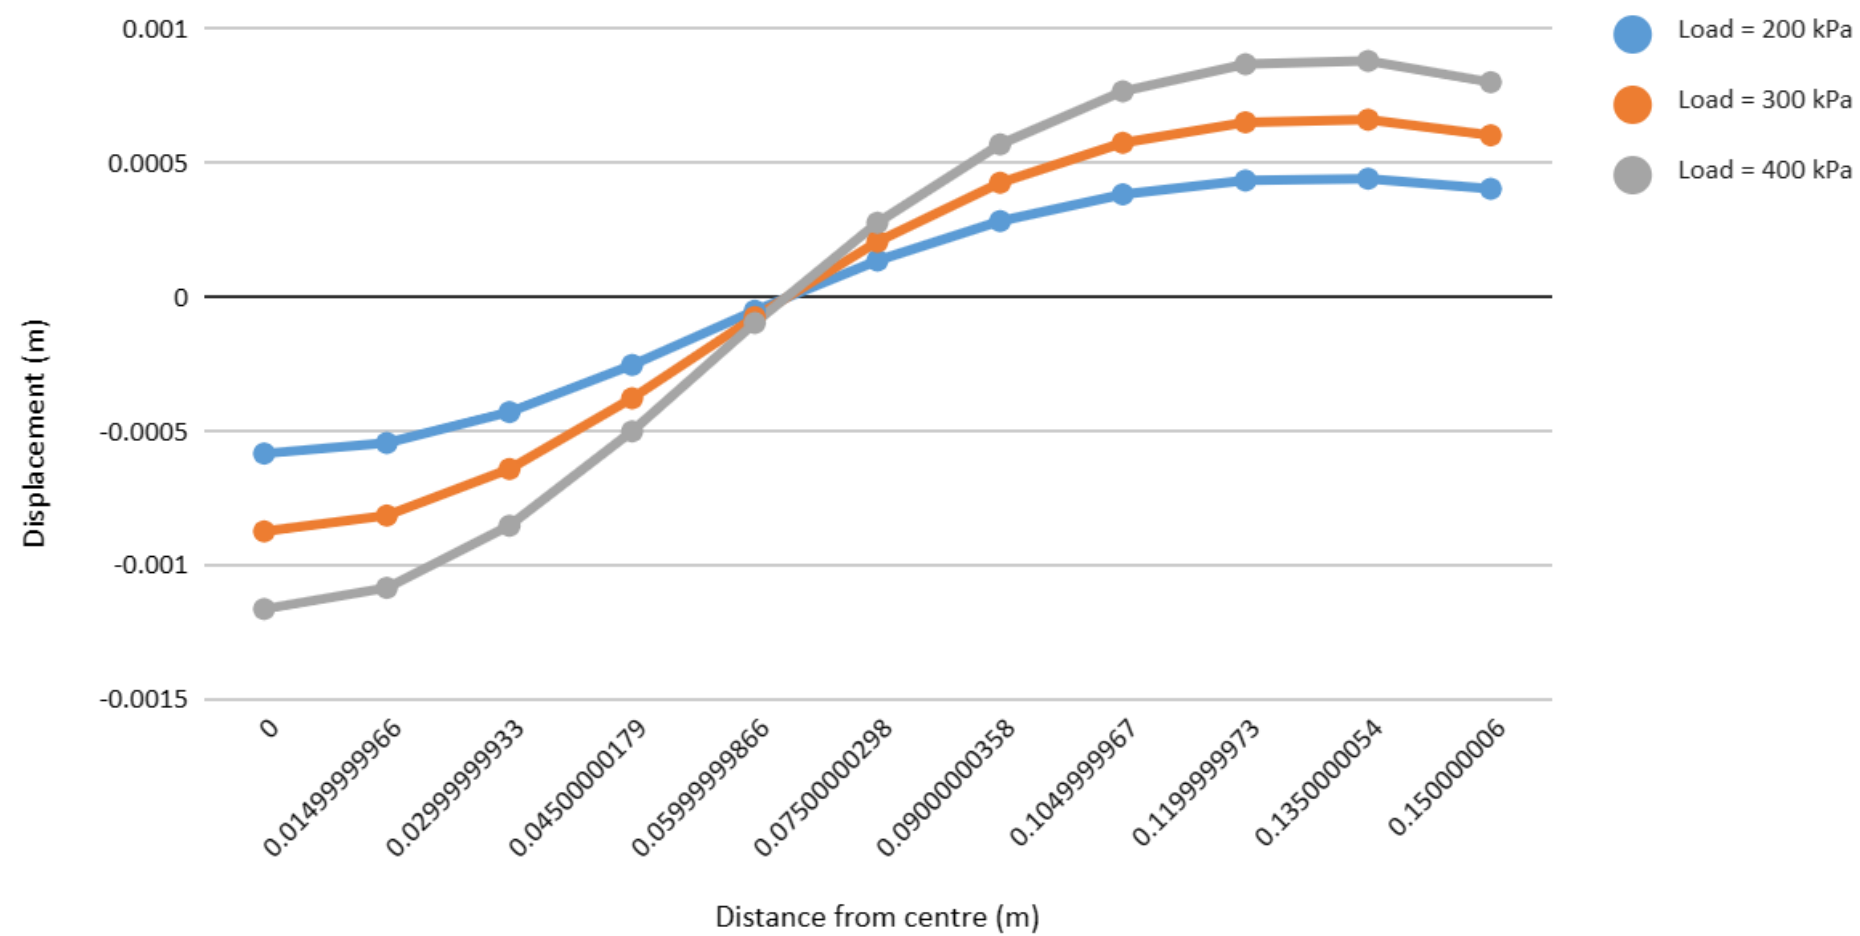

Settlement vs U2

# Unsoaked CBR Condition, Embankment's Slope 1:2

Settlement vs U1

Stress vs U2

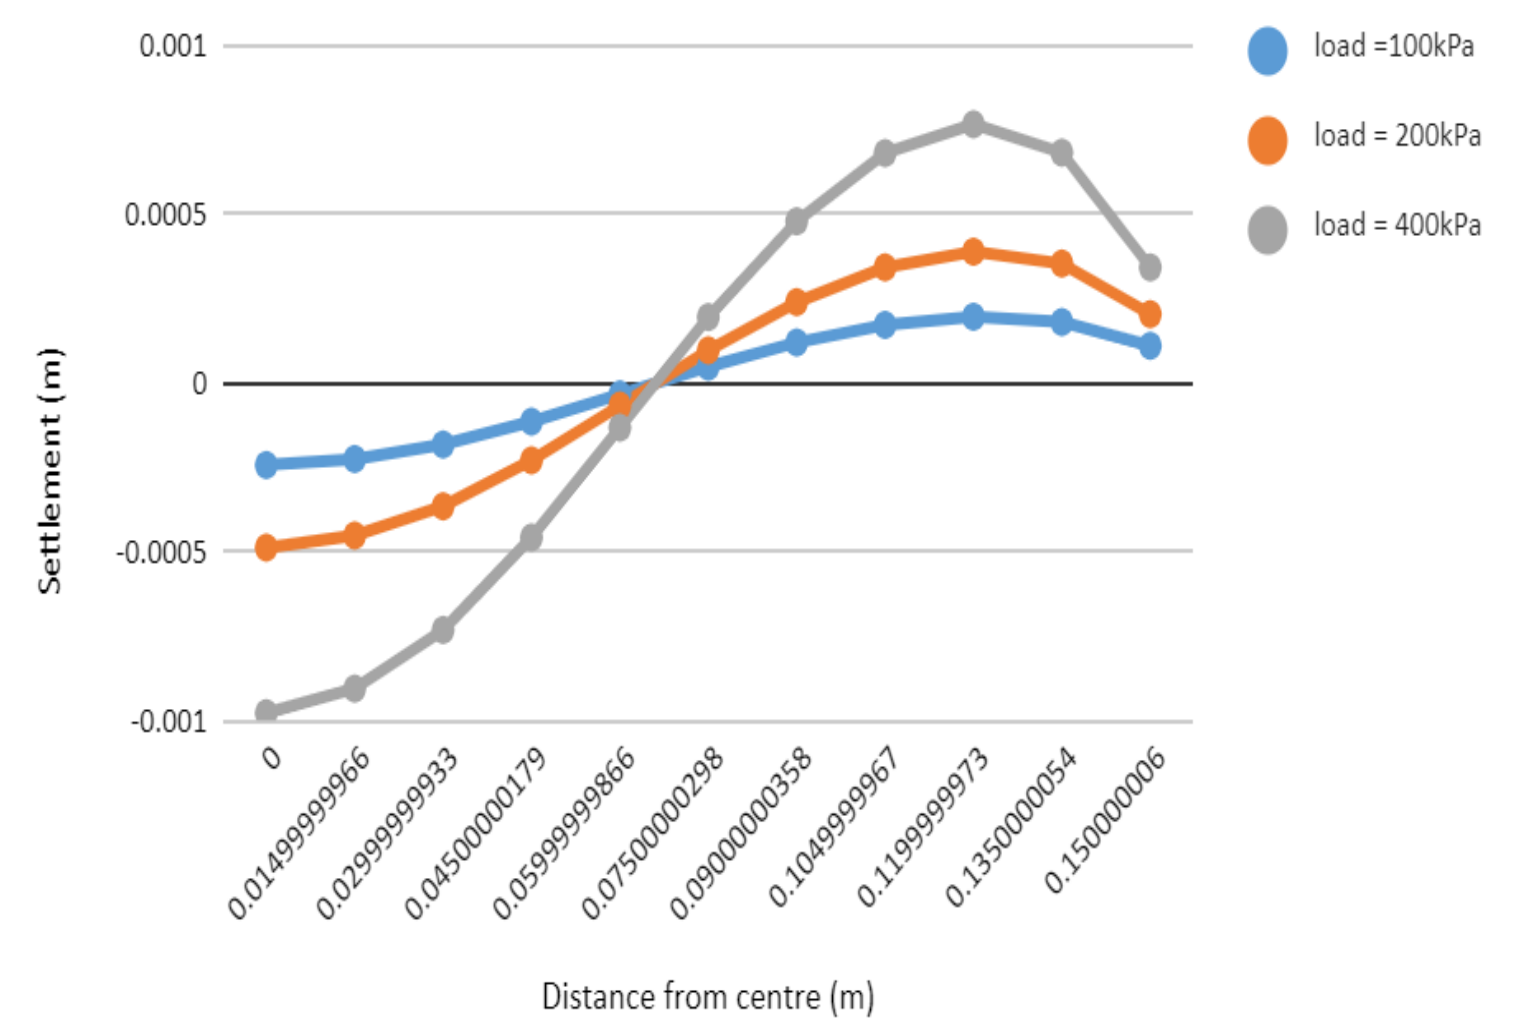

# Soaked CBR Condition, Embankment's Slope 1:1

Settlement VS Time

Settlement VS U1

# Soaked CBR Condition, Embankment's Slope 1:1

Settlement VS U2

Principal Stress VS U2

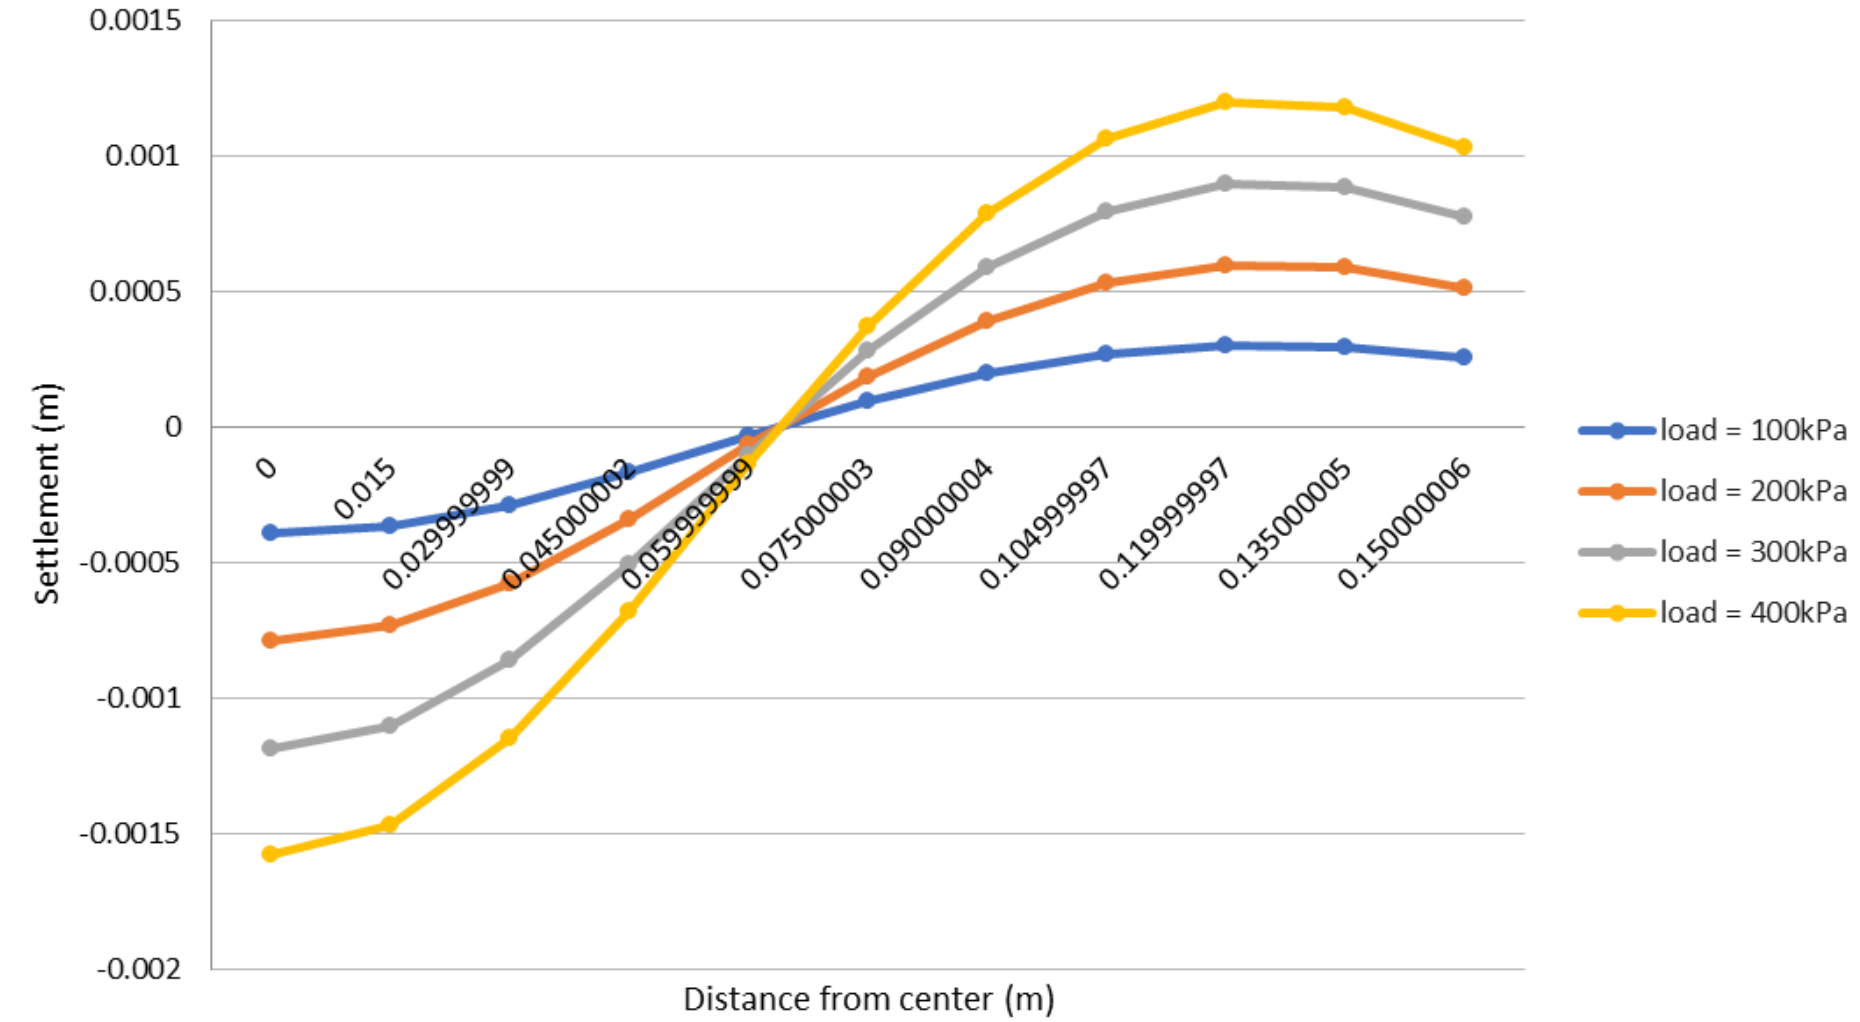

# Soaked CBR Condition, Embankment's Slope 1:1.5

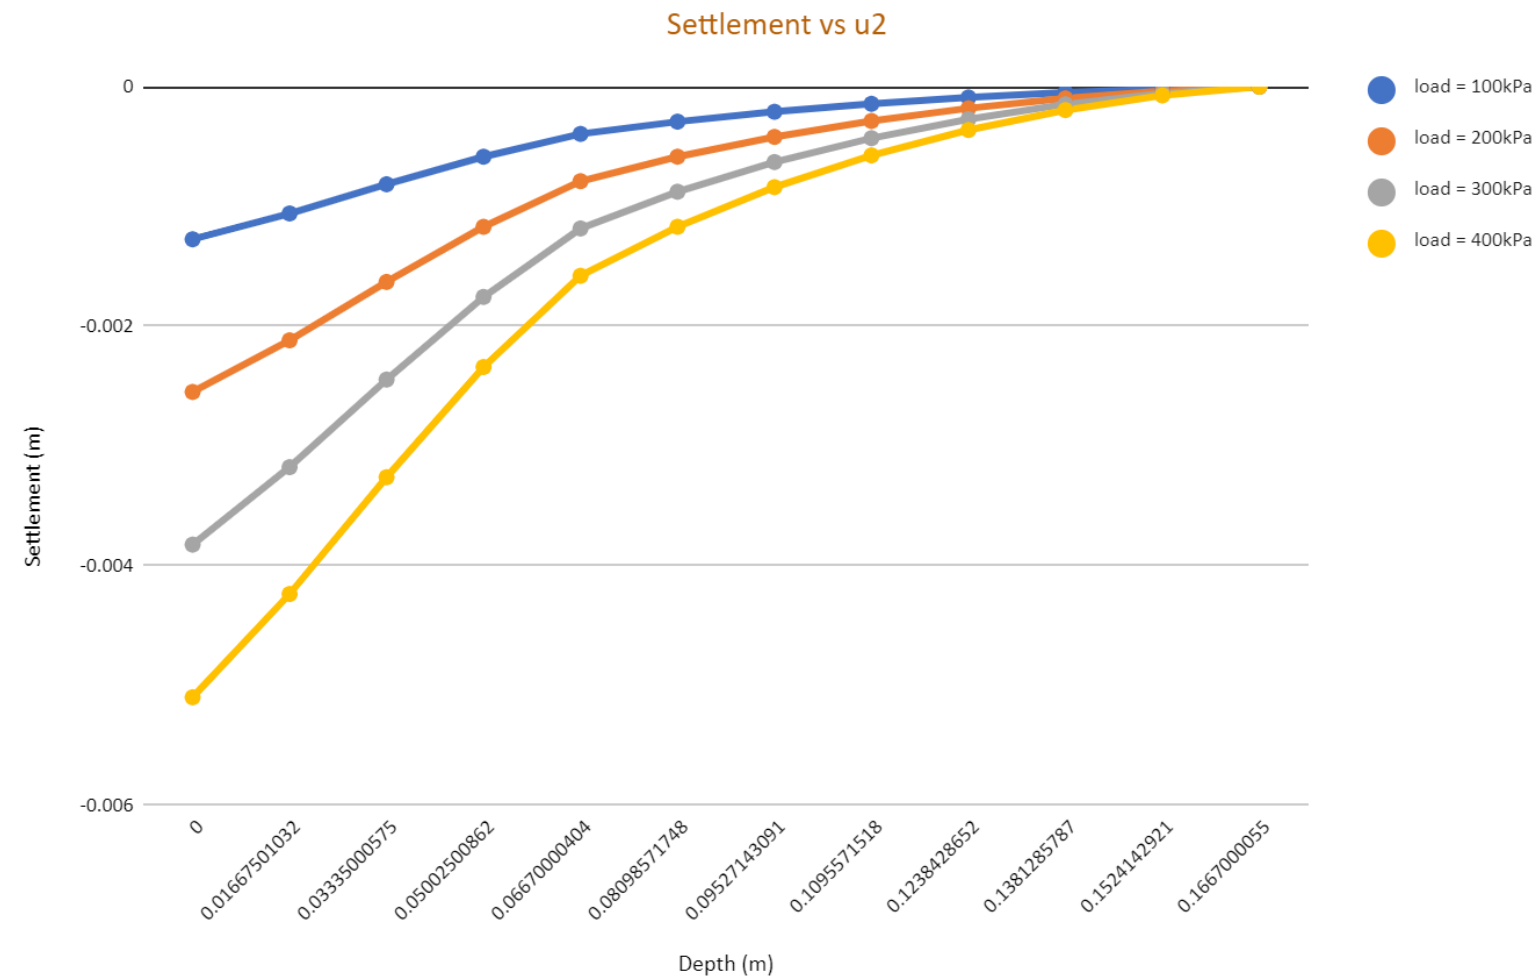

Settlement vs time

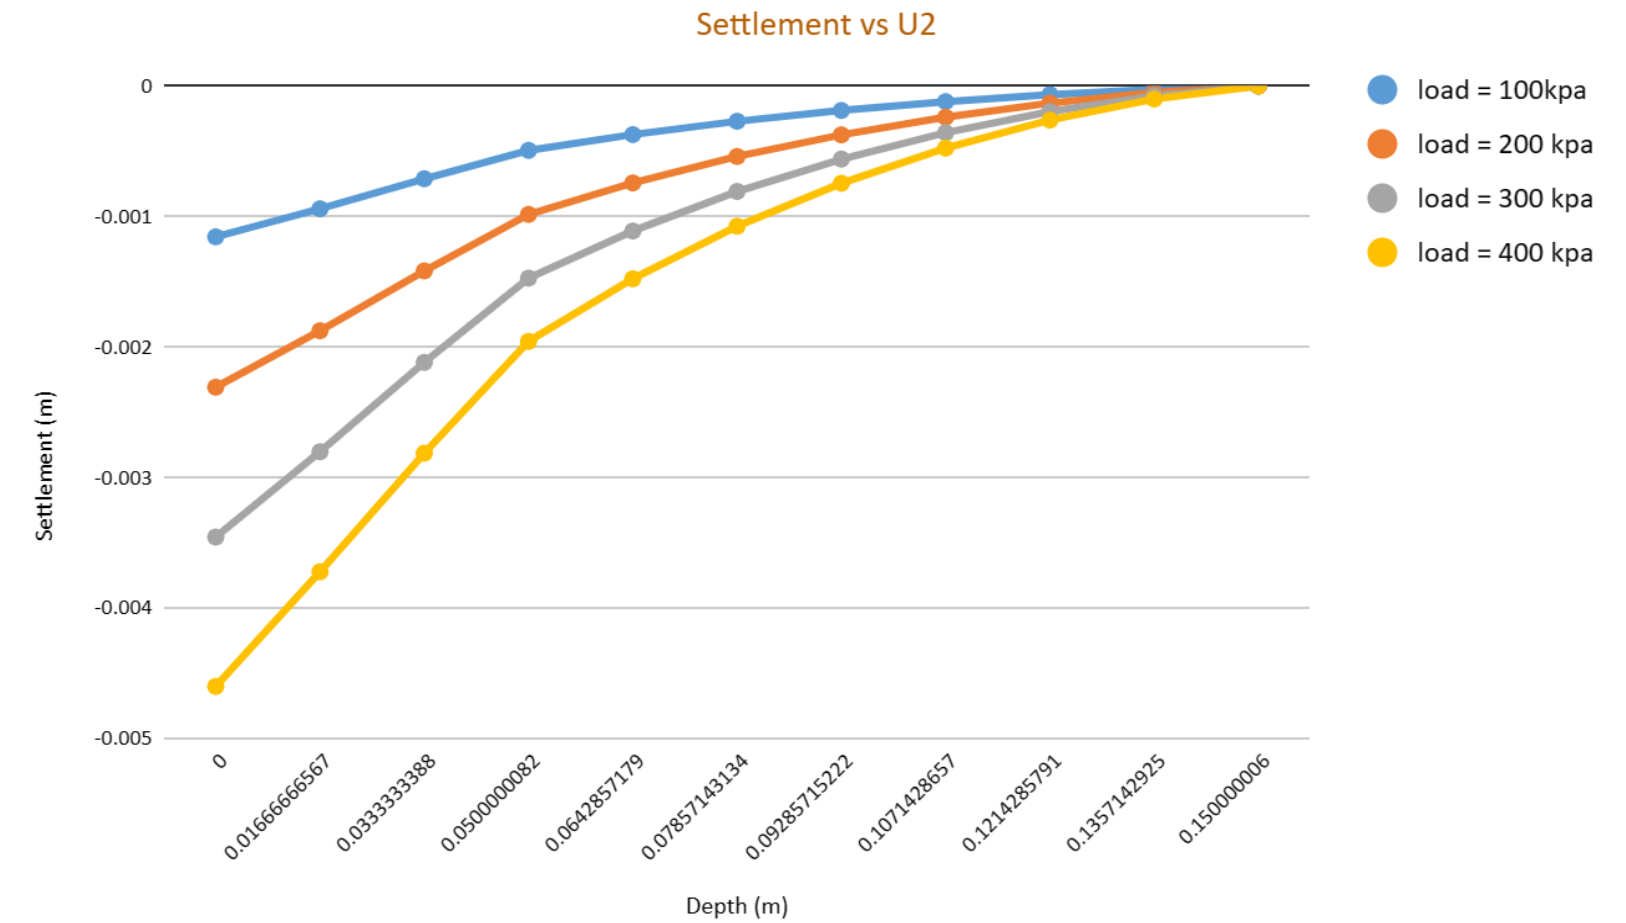

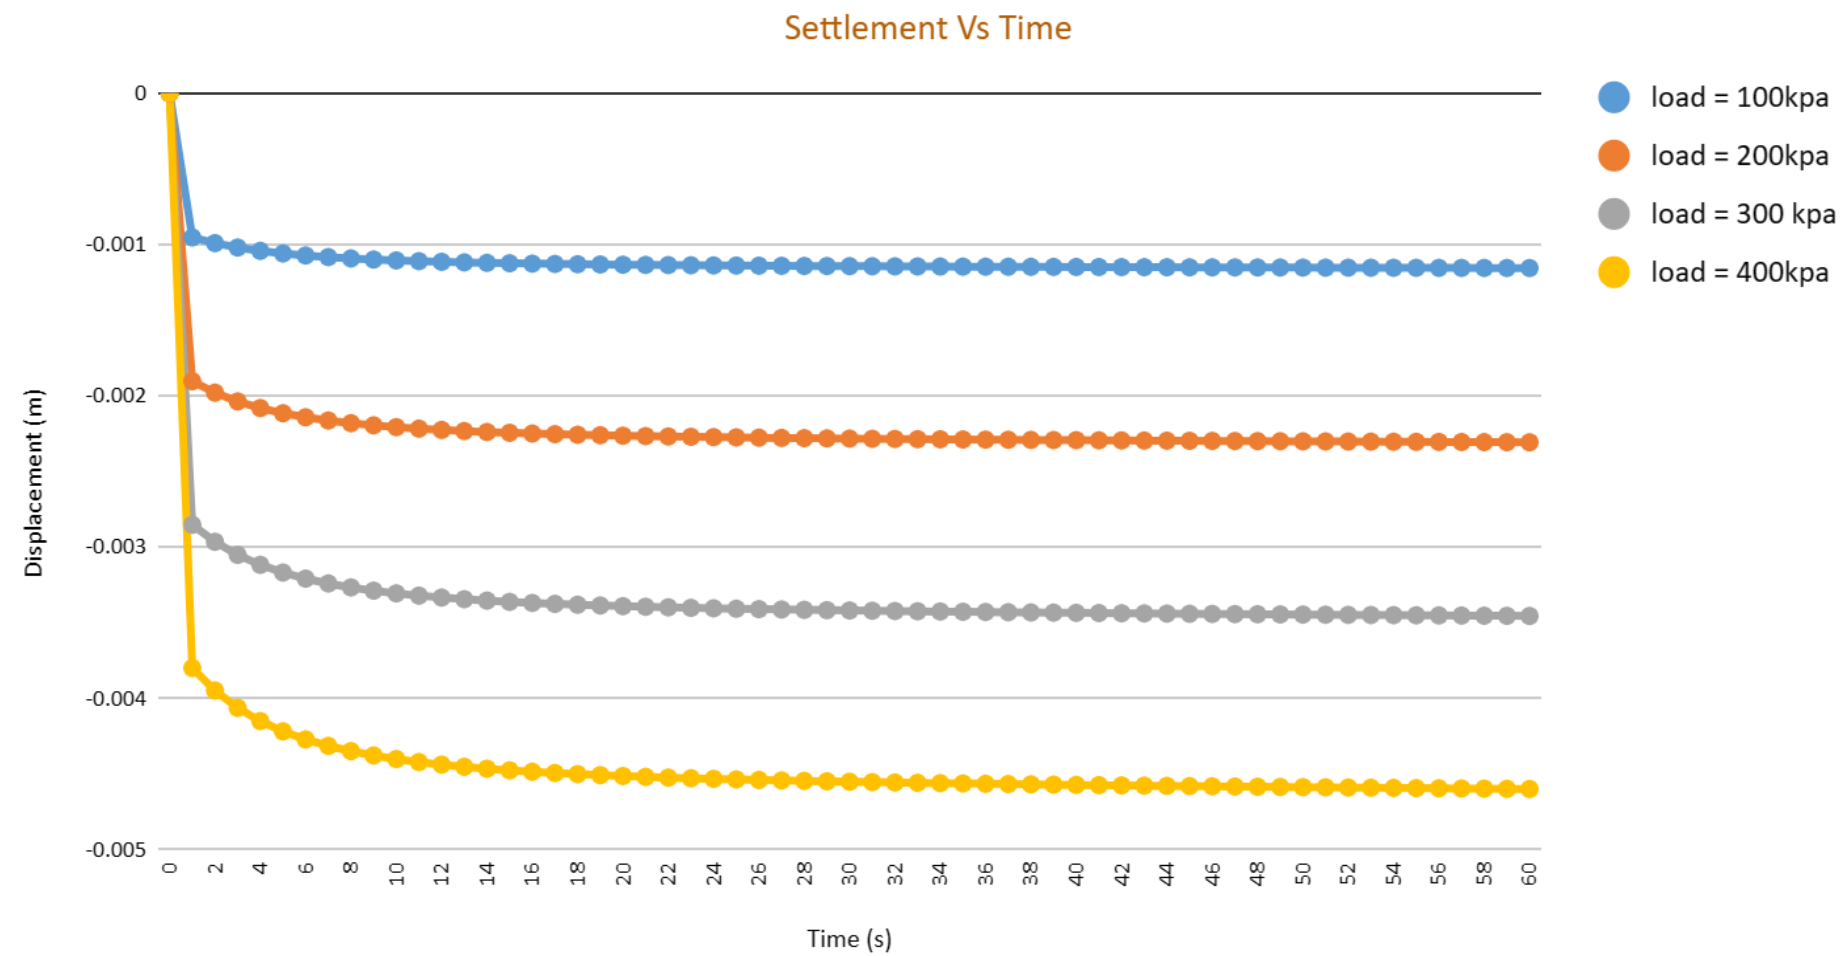

Settlement vs U1

# Soaked CBR Condition, Embankment's Slope 1:1.5

# Soaked CBR Condition, Embankment's Slope 1:2
